

## Breast Cancer Mini Array (TMAH-BRC-01)

**CAT number** TMAH-BRC-01

**Description** The breast cancer mini array is assembled by a collection of 12 breast cancer and 13 benign breast tumor/disease tissues, which were biopsies of 25 patients.

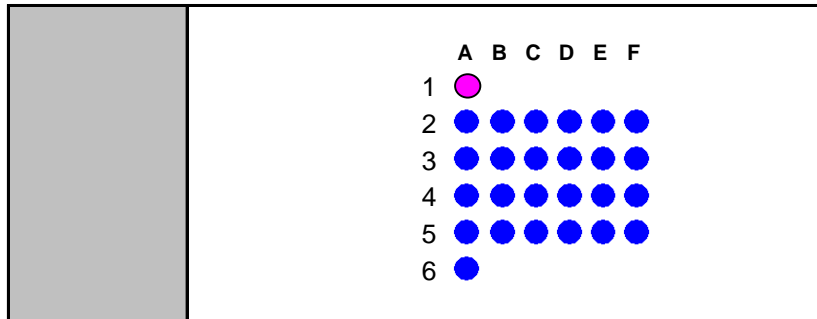

### Specification

- No. of cases: 25
- Tissue type: Breast cancer and benign breast tumors/diseases
- No. of spots: 1 spot from each case
- Total spots: 25 cores (or no less than 23 cores). One case cervical leiomyoma served as a land marker.
- Corresponding normal tissues with cancers: yes
- Diameter: 1 mm

### Documents:

- Product specification: layout, summary of tissue spots
- H&E stained images (to be posted)
- Pathological information: yes

**Notes:** Slides are recommended to be baked at 60°C for 1/2 hour prior to IHC or ISH procedures.

The core position consists of a capital letter (row) and a digital number (column).

● --- leiomyoma, serve as a landmark.

## Product Specification: Summary of Tissue Spots (TMAH-BRC-01)

Pos	Path. No.	Age	Sex	Path Diag (original)	Path Diag (current)	Grade	Image
A1	landmarker			leiomyoma	leiomyoma		
A2	19537-6	/	F	Breast cancer	adenocarcinoma	Low	TBP
A3	F10826	/	F	Breast cancer	Adjacent normal breast	Benign	
A4	19759	/	F	fibroadenoma	fibroadenoma	Benign	TBP

F4	F11269-1	/	F	fibroadenosis	fibroadenosis	Benign	TBP

- Pos-tissue core position
- Path Diag original – original pathological diagnosis from provider.
- Path Diag current – pathological diagnosis made based upon the tissue array cores.
- TBP- to be posted.
