

CERTIFICATE OF ACCREDITATION

The ANSI National Accreditation Board

Hereby attests that

RayBiotech, Inc.
3607 Parkway Lane, Suite 200
Peachtree Corners, GA 30092

Fulfills the requirements of

ISO/IEC 17025: 2017

In the field of

TESTING

This certificate is valid only when accompanied by a current scope of accreditation document.
The current scope of accreditation can be verified at www.anab.org.

A handwritten signature in black ink, appearing to read 'R. Douglas Leonard Jr.', is positioned above a horizontal line.

R. Douglas Leonard Jr., VP, PILR SBU

Expiry Date: 27 April 2022
Certificate Number: AT-2873

This laboratory is accredited in accordance with the recognized International Standard ISO/IEC 17025:2017.
This accreditation demonstrates technical competence for a defined scope and the operation of a laboratory
quality management system (refer to joint ISO-ILAC-IAF Communiqué dated April 2017).

SCOPE OF ACCREDITATION TO ISO/IEC 17025:2017

RayBiotech, Inc.

3607 Parkway Lane, Suite 200
Peachtree Corners, GA 30092

TESTING

Valid to: **April 27, 2022**

Certificate Number: **AT-2873**

Biological

Specific Tests and/or Properties Measured	Specification, Standard, Method, or Test Technique	Items, Materials or Product Tested	Key Equipment or Technology
QAH-INF-1 array for quantitatively measurement of ten serum proteins: IFN γ , IL-1 alpha, IL-1 beta, IL-10, IL-13, IL-4, IL6, IL-8, MCP-1, and TNF alpha	QAH-INF-1 array is intended for use in the quantification of human IFN-gamma, IL-1 alpha, IL-1 beta, IL-10, IL-13, IL-4, IL-6, IL-8, MCP-1, and TNF alpha through sandwich-based process	QAH-INF-1 array can be used for human serum samples with a 2x sample dilution. Results from QAHINF-1 array can be used to monitor the serum concentrations of these analytes in different health conditions Innopsys	Innopsys 710AL scanner; Wellwash Versa Microplate Washer
Human IL-1beta ELISA for quantitatively measurement of human IL-1beta protein	Human IL-1beta is intended for use in the quantitative of human IL-1beta through sandwich-based ELISA process.	Human IL-beta ELISA assay will be used to monitor the serum concentrations of human IL-1beta in different human health conditions.	BioTek ELISA reader

Note:

1. This scope is formatted as part of a single document including Certificate of Accreditation No. AT-2873.
